

KBE 70

Harmonious and flexible all round

KBE 70 double seal

Window system

KBE 70

KBE 70 is a modern window system with an installation depth of 70 mm. Perceptible heating cost savings, high sound insulation, reliable burglary protection, and a wide range of design options.

Efficiency

The KBE 70 system helps you to save heating costs to a measurable extent and raise the cosiness in your home. The five chamber technology achieves perceptible thermal insulation. Both standard triple and sound insulation glazing up to 44 mm thick can be installed with ease.

Slender sight lines

The small installation depth of only 70 mm gives rise to particularly slender sight lines. Your benefit: A larger glazed area and so greater passage of light and greater solar gains.

KBE 70 window with 70 mm installation depth

- » Thermal insulation of up to $U_f = 1.2 \text{ W}/(\text{m}^2\text{K})$
- » Five chamber technology
- » Slender profile sight lines
- » Triple glazing up to 44 mm thick
- » Modern design with individual laminate and colour variants
- » Lead free stabilisers in the virgin material for sustainability
